

GALINA HALE

RESEARCH ADVISOR

FEDERAL RESERVE BANK OF SAN FRANCISCO

Galina Hale (Borisova) is a Research Advisor at the Federal Reserve Bank of San Francisco, where she worked since 2006. Prior to her career at the Federal Reserve she was an assistant professor in the economics department of Yale University, where she taught international finance. She also taught a number of courses as a visiting faculty at Stanford and UC Berkeley. Research Advisor, Federal Reserve Bank of San Francisco

Galina began to study economics in Russia, first in Moscow State University economics department and then at the New Economic School's master's program. When in Russia, she briefly worked as a consultant for the Russian Ministry of Finance. She received her PhD in economics from UC Berkeley, under the supervision of Barry Eichengreen.

Galina's research interests lie in three main areas: understanding patterns of international capital flows and international financial crises, international banking, and stability of financial networks. Galina has published her work in such journals as the Economic Journal, Journal of Econometrics, Journal of European Economic Association, Journal of International Economics, Journal of Financial Economics, Journal of Banking and Finance, IMF Economic Review, among others. She co-wrote with Cheryl Long a monograph "Foreign Direct Investment in China: Winners and Losers."

In addition, Galina has been recently working on identifying ways for the Federal Reserve to get involved in the solution to problems related to climate risks, and on ways to make food system more sustainable.

In her free time, Galina trains for and participates in long distance running and triathlon races and travels to beautiful places.
